July 18, 2022

Location:

France

Subject Fields:

Humanities, Social Sciences

18 July 2022

Intelligence augmentation and amplification plus society 2022

2022 IAASOC International Forum

Our international forum aims at creating an innovative dialogue to explore new research issues and methodology for future symbiotic society with artificial intelligence. It involves researchers working on a wide array of topics and disciplines, in particular in the field of social sciences and humanity (SSH) and of computer/engineering sciences (CS/ES), revolving around artificial intelligence. The 35 participants, coming from Japan, Germany and France, will be divided into three theme panels to discuss the designated topics and draw the goals and its roadmaps for future society with scientific, technical, ethical and humanity challenges. Taking place over 3 days, the forum will start with a conference open to the public on July 18 and will alternate closed panel working meetings and plenary sessions.

- **18 July 2022 | 9.00 - 17.00 (Paris time)**
- *On site: GED Open Space, Campus Condorcet, 10 cours des Humanités 93300 Aubervilliers (France)*
