American Political Cultures Forum

Somerset Club (September 16)
Massachusetts Historical Society (September 17)

September 16-17, 2022

Register

The politics of the United States and its regions are founded on their political cultures. Since the nation's founding, regional, ideological, economic, ethnic and racial issues have shaped the many political cultures ruling American society. This *New England Quarterly* and Massachusetts Historical Society Forum features a keynote address by Professor Sean Wilentz and a day-long consideration by eleven scholars who treat American political cultures from the nation's founding through the emergence of "big" science and technology in New England and the United States' post-industrial era.

The conference will take place at the Somerset Club and Massachusetts Historical Society in Boston on 16-17 September 2022. The keynote address will take place on 16 September at the Somerset Club with the panels on 17 September at the Massachusetts Historical Society. [Learn more and view full conference schedule.](#)
