

## [USNewsmap.com - newspaper search engine](#)

Discussion published by Claudio Saunt on Wednesday, January 20, 2016

I would like to announce the launch of a new website that allows users to map search results from the Library of Congress's *Chronicling America* newspaper database. Built by eHistory.org and Georgia Tech Research Institute Analytics, [USNewsmap.com](#) allows scholars to visualize when and where newspapers wrote about a given search term. Please check it out.
