

## **STIs and fertility in the 1950s-60s**

Discussion published by Fabio Lanza on Tuesday, March 22, 2016

Dear colleagues,

One again I rely on the collective brain of H-PRC.

Does any of you know of specific works (or data collections) that deal with Sexual Transmitted Infections and/or women's fertility rates in the 1950s and 1960s? I am particularly interested in the Great Leap Forward period.

This is probably pie in the sky...

Thank you!

Fabio
