Greetings h-net.social Mastodon members,

H-Net's Mastodon instance, h-net.social, will be offline **Wednesday, December 7, starting around 7pm Eastern** to upgrade to the latest version of the platform. This update will include some security fixes as well as new features including the ability to filter followed accounts' posts by language, following hashtags, translating posts, editing, and an improved filtering system. We anticipate a downtime of 1-2 hours.

Thank you for your patience as we work to improve your user experience on h-net.social.

All the best,

Jesse Draper

Executive Director, H-Net
