Founded in 2009, The [Climate Change: Impacts & Responses Research Network](#) is brought together by a common concern for the science of, and social responses to, climate change. We seek to build an epistemic community where we can make linkages across disciplinary, geographic, and cultural boundaries. As a Research Network, we are defined by our scope and concerns and motivated to build strategies for action framed by our shared themes and tensions.

The **Sixteenth International Conference on Climate Change: Impacts & Responses** calls for research addressing the following [annual themes](#) and special focus:

- *2024 Special Focus—Purpose Driven Organizations*
