Application period open for 2023-2024 National Stereoscopic Association Research Fellowship

Announcement published by Micah Messenheimer on Thursday, December 22, 2022
Type: Fellowship
Date: February 28, 2023
Location: District Of Columbia, United States
Subject Fields: Art, Art History & Visual Studies, History of Science, Medicine, and Technology, Popular Culture Studies

The Library of Congress is now accepting applications for the 2023-2024 National Stereoscopic Association Research Fellowship. Please share the announcement with any colleagues you think might be interested.

National Stereoscopic Association Research Fellowship

The National Stereoscopic Association Research Fellowship is made possible by a gift from the National Stereoscopic Association (NSA) to support research within the Prints & Photographs Division holdings of stereoscopic photography and the unparalleled photographic history collections at the Library of Congress—including over 15 million photographs, rare publications, manuscript materials, historic newspapers, and extensive subscription database access.

Fellowships will be awarded annually to be used to cover travel to and from Washington, D.C., accommodations, and other research expenses to assist fellows in their ongoing scholarly research and writing projects on stereoscopic photography, or more broadly within the field of photographic history to the extent that research is connected in some manner to the Library's holdings on the format.

Eligibility and Guidelines

Graduate students, postdoctoral researchers, independent scholars, creators, and other researchers with a need for Fellowship support are encouraged to apply. Individuals who are not U.S. residents but who otherwise meet the above qualifications may apply and be considered for a Fellowship, contingent upon visa eligibility.

In the interest of increasing awareness and extending documentation of Library of Congress collections, Fellows are required to make use of the Library's collections, be in residence at the Library during the award period, and share information derived from their research...
through publication in *Stereo World* or on the Library's *Picture This* blog, a public lecture, presentation at the following National Steroscopic Association Convention, or other event, either during their residency or within six months of completing their research at the Library. Each Fellow must also notify the selection committee if their work results in formal publication and provide a hard-copy or online access to the work.

**To Apply**

Information about applying for the fellowship is available at this link: [https://www.loc.gov/rr/print/national_stereoscopic.html](https://www.loc.gov/rr/print/national_stereoscopic.html)

Applications are due on February 28th, 2023. The Fellowship must be completed between September 1st, 2023 and August 31st, 2024.
