United Kingdom

Subject Fields:

Australian and New Zealand History / Studies, British History / Studies, Canadian History / Studies, Colonial and Post-Colonial History / Studies, South Asian History / Studies

A new bespoke archival digitisation service has launched in the UK. Run by a team including a historian and a cameraman/photographer, Digitised Archive is an efficient and affordable way to digitise files from any library or archive in London or Oxford. If you need to access archival material, but don't have the time or money for research travel, this is for you. Access the website at digitisedarchive.co.uk to get started.
