

## [Submitting a Link](#)

Page published by Douglas Priest on Friday, May 20, 2016

**Links are another content type on the H-Net Commons.** The Link content type offers a powerful and ultimately easy to use engine for managing and displaying links. .

All the links added to a Network will appear in the **Links page** accessible using the Links button located in the tabbed content type menu at the top of your networks.

To **submit a link** to your Network, click the Links tab of your Plan Network and then the **orange Create New Link button**.

In the **Title** field include a name for your link. This will probably be the name of the Web Site to which you are linking. Let's create a page to the H-Net Commons homepage. First, be sure to name your Link appropriately.

In the **URL** field include the URL to the page, for example: <http://networks.h-net.org>. Afterwards, type a short description of the link in the **description field** to tell those who find the link about the site.

Remember to give it a **Keyword**.

Links go through moderation and will be reviewed by your editor before it is published. **Preview** and **submit** accordingly.
