

[2 symposiums on victims of the Fukushima nuclear disaster](#)

Discussion published by Tom Gill on Monday, July 2, 2018

Dear fellow H-Japan subscribers,

Please find below the programme for a pair of symposiums I have been organizing on the very varied experiences of the victims of the 2011 Fukushima nuclear disaster. This weekend (July 7/8) there'll be a bilingual (English/Japanese) symposium at the Meiji Gakuin campus in Totsuka, Yokohama, featuring seven researchers who have been working on the plight of Fukushima evacuees for many years, along with six of the evacuees themselves, who will talk about what they have been through the last 7 years and more. Then next weekend (Sat July 14) there'll be a second symposium in Fukushima city, this time in Japanese only.

Attendance is free, but please let me know in advance if you plan to attend either event.
