

IDB Energy Innovation Center

Page published by Tammy Nemeth on Monday, July 7, 2014

The Energy Division of the Inter-American Development Bank has created a comprehensive international energy database that is open to the public. The database contains statistical data, energy research related resources, graduate programs, think tanks, journals, media, research centers, and much more. Below are links to the IDB Energy Innovation Center website and quick links to branches of the database.
