Call for Chapters

Proposals Submission Deadline: September 1, 2019

Full Chapters Due: September 30, 2019

Submission Date: October 15, 2019

Introduction

The behavioural based intervention in designing public policies has become an important field of study in recent years. This line of study is scrutinised by either academia or research boutiques which commissioned research for the public sector or individual businesses. An impressive number of empirical studies were devoted to analyzing how to design better policies starting from the field of behavioural economics, social psychology, sociology, anthropology, economy, political science, design (human-centred design and design thinking) or effective state and non-state bureaucracies through the world. Therefore, it is important to map out the research projects developed so far, because there is a strong need for an edited collection of original research in this area.

Objective

This book will aim to provide a glimpse of the theoretical frameworks in use and some of the latest practical reported research findings in the area. It will be written for both practitioners in the policy-making field and academics who want to improve their understanding of the behavioural based intervention in designing public policies.

Target Audience

The target audience of this book will be composed of professionals and researchers working in the field of policymaking as well as those working in the administrative sciences and management, behavioural economics, social psychology, sociology, anthropology, economy or political science. Moreover, the book will provide insights and support leadership in the public administration with the framework of behavioural science. Policy-making knowledge applied in different types of communities and cultural environments will be disseminated for the benefit of the target audience.

Recommended Topics

- behavioural sciences and the making of public policies
- behavioural policy-making
- participation and control in behavioural based public policy making
- the legitimacy of behavioural policy making
- decision making context and biases
- libertarian paternalism at work
- social norms, beliefs and policy making
- choice architecture and policy infrastructure
- behavioural insight case studies for policy making
- scaling up the intervention to improve the communities' well being
- public policies adoption - nudges and players
- healthy behaviours - researches on effective nudge

Submission Procedure

Researchers and practitioners are invited to submit on or before **September 09, 2019**, a chapter proposal of 1,000 to 2,000 words clearly explaining the mission and concerns of his or her proposed chapter. Authors will be notified by **September 15, 2019** about the status of their proposals and sent chapter guidelines. Full chapters are expected to be submitted by **September 30, 2019**, and all interested authors must consult the guidelines for manuscript submissions at <https://www.igi-global.com/publish/contributor-resources/before-you-write/> prior to submission. All submitted chapters will be reviewed on a double-blind review basis. Contributors may also be requested to serve as reviewers for this project.

Note: There are no submission or acceptance fees for manuscripts submitted to this book publication, Behavioral-Based Interventions for Improving Public Policies. All manuscripts are accepted based on a double-blind peer review editorial process.

All proposals should be submitted through the eEditorial Discovery_{TM} online submission manager.
