

["Ab Imperio Syllabus" tool](#)

Discussion published by Aleksandr Turbin on Thursday, January 16, 2020

Dear Colleagues,

As many of us are working on developing and updating syllabi for the spring semester, you might find the following tool useful in your work.

The Ab Imperio syllabus tool helps identify materials from over 20 years of the journal run both chronologically and thematically.

We are launching the project "Ab Imperio Syllabus" (Reading Library for Your Syllabi) to facilitate navigation among the English-language articles published since May 2000, by keywords, periods, and formats.

Network members may be particularly interested in the "Ukrainians" compilation in the "Keywords" section.
