

"Our Ancestor was an Animal that Breathed Water": Non-Human Beings and Art of the Anthropocene

Announcement published by Jody Cutler on Thursday, August 13, 2020

Type:

Call for Papers

New York,

Date:

August 13, 2020 to September 16, 2020

Subject Fields:

Animal Studies, Art, Art History & Visual Studies, Contemporary History, Fine Arts, Environmental History / Studies

Seeking relevant papers for a session at the upcoming College Art Association Conference, Feb. 10-13, 2021, originally scheduled to be held in NYC but currently being reorganized as (mainly) a virtual event (details forthcoming - same dates apply; prospective participants, please have considerable flexibility through those dates until organizers solidify the conference schedule).

Please see submission requirements and other details, followed by a list of sessions, at the official CAA "Call for Papers" site: <https://caa.confex.com/caa/2021/webprogrampreliminary/meeting.html>.

The session title, "'Our Ancestor was an Animal that Breathed Water': Non-Human Beings and Art of the Anthropocene" (as above) includes a quote from Charles Darwin, who broached what we now call animal rights with noted sensitivity. The full session description is here: <https://caa.confex.com/caa/2021/webprogrampreliminary/Session7283.html> (or scroll from CAA's main CFP page, above).

Please email me directly an abstract of **250 words max**, along with the required submission form and info for consideration. If you wish, you may attach up to five small-format jpg images (each a separate attachment). Please feel free to email with any preliminary questions.

Thank you.
