Other Education is seeking book reviewers for 2021. We are an open-source international academic online journal that considers education differently. With this, our book reviews (and reviewers) might consider the field of education expansively. We are open to various structures of a book review:

Book Reviews

More than a summary, a book review is intended to provide an engaged evaluation of the themes, arguments and approaches to the text, as well as to provoke further contemplation and interaction with what the book has (or, if found lacking, needs) to offer.

Review Essays

A review essay is an opportunity to write beyond the book being reviewed to incorporate your own work/thinking/imagining, opening up and expanding debates that the book generates and contributes to. A larger word count is intended to facilitate a deeper engagement with the themes of the text placed in conversation with personal/professional reflections.

Other Reviews

In keeping with the journal's aims, potential reviewers are encouraged to consider and attempt departures, deviations, blurrings and otherwise experiment with standard academic review practice. This too applies to what is considered an educational book/a book on education. The above notes therefore are offered as guiding notes.
