

[2018 ICPSR Summer Program: Courses in Statistics & Quantitative Methods](#)

Announcement published by Stephanie Carpenter on Thursday, November 16, 2017

Type:

Summer Program

Location:

United States

Subject Fields:

Public Policy, Political Science, Sociology, Research and Methodology

Hello, H-net members,

I'm pleased to announce the 56th annual ICPSR Summer Program in Quantitative Methods of Social Research.

The ICPSR Summer Program provides rigorous, hands-on training in statistical techniques and research methodologies used in the social, behavioral, and medical sciences. We strive to fulfill the needs of researchers throughout their careers by offering instruction on a broad range of topics, ranging from introductory statistics to advanced quantitative methods and cutting-edge techniques. Our participants include graduate students, faculty, researchers, and policy analysts from more than 350 universities, institutions, and organizations around the world.

From May through August 2018, we will offer more than 80 courses in cities across the U.S. Our courses range in length from 3 days to four weeks.

Our four-week sessions are held in Ann Arbor, Michigan:

First Session: June 25 - July 20, 2018

Second Session: July 23 - August 17, 2018

We will also offer dozens of short workshops in Ann Arbor and other cities.

We will announce our 2018 schedule in January, and registration for all courses will open in early February. Scholarships are available.

For more information, visit www.icpsr.umich.edu/sumprog or contact sumprog@icpsr.umich.edu or (734) 763-7400.

Thanks for your attention!

Stephanie Carpenter, Education Support Specialist, ICPSR Summer Program
