A Call for Environmental History Comps & Quals Reading Lists - NiCHE

Discussion published by Jessica DeWitt on Thursday, March 17, 2022

As part of the Network in Canadian History and Environment's ongoing interest in expanding our Teaching and Education Resources, we’re currently collecting comprehensive/qualifying exam reading lists in environmental history and adjacent fields. Graduate students and newly-minted PhDs: send your lists our way! We’ll give them a home on the NiCHE website where they’ll be available for others to peruse, learn from, and be inspired by.

We know that some graduate programs maintain standardized lists while others ask students to develop their own — we want them all! If you’re willing to share, email your lists to Jessica DeWitt (jessicamariedewitt@gmail.com) and Addie Hopes (hopes@wisc.edu) as .docs or pdfs. Please include the university, department, and year.
